

SEI General Meeting, 10/16/08

- Guest Speaker: Dr. Harding, Linus Pauling Chair
 - Reminder of Gleeson laboratory policies
 - SEI has a designated work area in the Gleeson basement to be used for construction (dry lab only, no volatile materials)
 - We also have bench space in Gleeson 108 (wet lab, chemicals and volatile materials OK)
 - Reminder: Always wear goggles or you will be asked to leave
 - Only one person in the club will have a key to the lab space, so we will need to coordinate
- Guest Speaker: David Dickson, Graduate Student in Dept. of Biological and Ecological Engineering
 - Spoke about the various hydrogen energy technologies
 - Oregon State is one of the leaders in microbial fuel cell technology
 - David works with Dr. Roger Ely on the use of nitrifying bacteria in hydrogen production
- Next meeting will be a Fiji Project Session on October 23 at 6pm in Gleeson 306 (library)
